

Clean version of changes to the Abstract.

### **ABSTRACT OF THE DISCLOSURE**

A fixed rotary sleeve to rotate at a fixed position, wherein on outer periphery of the drive member and the driven member are integrally formed with open grooves for insertion of drive rods, and cylinders are employed to abut against the outer peripheries of the drive member and the driven member, so as to confine the respective drive rods in the respective open grooves of the drive member and of the driven member respectively. Thereby, the fixed rotary sleeve in accordance with present invention can be produced without special machines and cramping apparatuses, thus the production cost is reduced.

It is believed that the foregoing constitutes a full and fair Election and Amendment in response to the Restriction. If anything further is required, please telephone Applicant's United States Attorney, Charles E. Baxley. His contact information is set forth below.

Respectfully,

CHARLES E. BAXLEY
